

Nuncius Cœlestis :
OR, THE
STARRY MESSENGER

For the Year of our Redemption 1681.
And from the Creation, according to Sacred
Writ 5630.

Being the First from the Bissextile or Leap-year.

Wherein is contained (1) *Astronomical and Meteorological Observations.* (2) *Astrological Preditions* of the State of the Year, deduced according to ART, from the Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Planets. (3) *The Rising and Setting* of the Sun and Moon: Also Her *Southing*; Together with many useful Rules and Tables pertinent for such a Work, Accommodated to the Meridian of London, which lies in the Latitude of 51 deg. 32 min. North, but may indifferently serve (without sensible Errour) for any other part of Great Britain.

By HENRY COLEY, Student in the *Mathematicks* and the *Cœlestial Science*.

The Tenth Impression.

Legere perlegere & tunc Judicare.

I will behold the Heavens, even the works of thy Fingers, the Moon and the Stars which thou hast ordained, Psal. 8. 3.

LONDON:

Printed by J. G. for the Company of Stationers, 1681.

According to my promise the last Year, I appear again in the same Mode this present Year 1681, which, God willing, I intend to continue; and since some persons have desired all the Planets places every day at Noon, I have therefore to please them, not only inserted the Sun and Moons place (as before) to every day throughout the year, but the other five Planets and the ☾ also, for every fifth day in each Month, which by an easie proportion may be continued to every day, or any hour of the day and night, and thus with a TABLE of Houses (which you may have plenty) from any expired Ephemeris of Mr. Lilly's you are fitted for setting of Schemes upon all occasions. You are here presented likewise with a probable Conjecture of the Weather, grounded upon experience, and some years Observations; also the ☽'s Rising, Southing, and Setting, with the ☉'s Rising & Setting for every 3d day in the year, and the increase and decrease of days, High water at Lond. Bridge, & most of the Ports in Engl. Scotl. & Irel. the Lunar and Mutual Aspects, Monthly Observations or General Judgments Astrological upon each Quarter, with a Cronology and Table of Interest, and all other Furnishings proper for such an Annual Book, so that I may say, you have *multum in parvo*, and 'tis composed with no small care and pains for the publick good, which I hope may be as kindly accepted as freely presented. If any mistakes appear, either through haste or inadvertency, let them be winked at, & greater care shall be taken for the future. As for those that out of envy or prejudice shall carp at my Indeavours, let them amend what I have done, and I shall freely give them preeminence. And for those persons also that are disaffected, or oppose the Art of Astrology (as some there ever were and will be) let them consider the secret Influence and Operations of the Celestial Bodies, & that this Influx proceeds from reflection of beams, but especially that which they receive from the Sun, there is a secret mystery herein, and if any man ask the reason thereof, I first request him, whence comes the Sympathy and Antipathy betwixt all Vegetable, Mineral and Animal Creatures? why doth a man naturally fear the Serpent, the Lyon the Cock, the Kite, the Mole the Cat, the Hare the Hound, &c. whence arise the variable Tinctures of Leaves, Flowers and Fruits, the most exquisite smelling of the Spaniel, the careful providence of the Ant, the orderly Government of the Bee, whence come these, I say, but from such secrets of Nature that the capacity of man can very hardly apprehend; therefore since the Art of Astrology is grounded upon the Configurations and secret Influence of the Planets and Stars, so hard to be discovered by long Study and much Experience, let no man condemn it.

Gentlemen, Yours to serve you, H. C.

The Julian or old Account used in England.

Charles	2	1620	1648 Jan. 30	28		Whom God grant long to Reign	

*This Table tells us of our Cæsars Birth,
 When 'gaze to Reign, how long they sway'd on Earth
 In Pageant Glories, real Cares and Pains,
 And last recounts the end of all their Reigns.
 Conclude in Dust; O sad! what's learned here?
 But dire Remembrances that once they were:
 Of twenty six doth only one remain,
 Whom God preserve, grant long and prosperous Reign.*

A TABLE shewing upon what point of the Equator the Moon makes a full Sea in any of the under named Places, with the Hours and Minutes to be added to her coming to the South, for the time thereof.

This Table is so plain, and easie, that it needs no Explanation more than the Titles direct. Note, That Easter ever falleth between the 21 of March and 25 of April exclusively, and if the Golden Number be either 5, 13, or 16. and the Dominical Letter C, then Easter-Day falls on our Lady-Day, or the 25 of March. Likewise when the Golden Number is 8, and the Dominical Letter G, Easter-Day falls on St. Marks day, or the 25 of April.

1681

January hath xxxj. days.

Last quarter the 1 day 18 min. past 4 afternoon.
 New Moon the 9 day, 52 min. past 7 afternoon.
 First quarter the 17 day 25 min. past 5 in the morning.
 Full Moon the 23 day, 6 min. past 10 at night.
 Last quarter the 31 day, near half an hour afternoon.

D	South	☉ place	H. Wat.	Astrological Predictions.			
1	5	M. 58	22	68	M. 38	Welcome you (my friends) to our year	
2	6	50	23	7	9	50	more,
3	7	36	24	9	10	36	The old Year now is past and gone be-
4	8	20	25	10	11	20	fore,
5	9	5	26	11	12	5	And to live well in this that's com-
6	9	56	27	12	0	A. 56	ing in.
7	10	50	28	13	1	50	As old years pass, so let new lives be-
8	11	50	29	15	2	48	gin.
9	12	24	0	16	3	24	The year begins very hopefully, and
10	1	A 50	1	17	4	50	now many generous active Spirits use
11	2	45	2	18	5	46	those utmost endeavours to compose
12	3	38	3	19	6	38	their differences which have for some
13	4	25	4	20	7	25	time been under debate, producing
14	5	25	5	21	8	25	Fears & Jealousies amongst the peo-
15	6	10	6	22	9	10	ple, who are generally too credu-
16	6	58	7	23	9	58	lous, and frequently perplex them-
17	7	46	8	24	10	46	selves, with meer shadows of ap-
18	8	35	9	25	11	35	proaching danger without just cause
19	9	25	10	26	12	25	This whole Month is (for the most
20	10	11	11	27	1	M. 11	part) attended with very propiti-
21	10	56	12	28	1	56	ous Configurations, whose influence
22	11	42	13	29	2	42	may happily unite the Spirits of
23	12	20	14	30	3	20	male-contented persons. And hence
24	0	M. 30	15	31	3	30	we may justly hope no more storms
25	0	56	16	31	3	56	are impending, nor any New Plot
26	1	34	17	32	4	34	contriving at this present juncture
27	2	22	18	33	5	22	of time— But various Intelligence
28	3	16	19	34	5	16	may be expected, and in all proba-
29	4	2	20	34	7	2	bility more pleasing and welcome to
30	4	50	21	35	7	50	some of the worthy Merchants of
31	5	34	22	3	8	34	London than was expected.

New Moon the 8 day, 48 min. past 11 in the morning.

First Quarter the 15 day. 37 min. past noon.

Full Moon the 22 day, 6 min. past 11 in the morning.

Note, That by making proportion (which is vulgarly known) you may obtain the places of the five Planets to every day at Noon, and consequently for any hour of the Day or Night &c.

1	6	M. 32	22	Y	17	9	M. 32	
2	7	24	23	16	10	24		Nothing in Nature's lober found,
3	8	16	24	14	11	16		But an Eternal Health goes round!
4	9	4	25	13	12	4		
5	10	5	26	10	1	A. 50		Now or near this time we may ex-
6	11	32	27	10	2	32		pect something of the Effects of the
7	12	6	28	8	2	50		last months configurations; many dis-
8	0	A. 52	29	7	3			orders & Law controversies appear,
9	1	20	0	5	4	20		perhaps amongst those pretending to
10	2	16	1	3	5	16		Religion, ambition and self-interest
11	3	48	2	2	6	48		is the foundation thereof— And we
12	4	42	3	0	7	42		rarely want matter to exercise our
13	5	16	3	58	8	16		wonder, and I may say fears too, and
14	5	58	4	56	8	58		this not only at home, but from a
15	6	42	5	54	9	42		broad also—Germany, France, and
16	7	25	6	53	10	25		Spain are likewise concern'd of weh
17	8	5	7	51	11	5		expect particular Intelligence about
18	8	48	8	49	11	48		this time—The Air is something
19	9	16	9	47	12	18		contagious, and 'tis to be feared an
20	10	58	10	45	1	M. 58		Epidemical Disease may too sud-
21	11	46	11	43	3			denly break forth. And if some per-
22	12	34	12	41	3	40		sons will be so rash as to hasten their
23	1	M. 20	13	39	4	20		own Ruine, let them enjoy the just
24	2	0	14	37	5	6		reward of their own merits.—But,
25	2	48	15	35	5	50		
26	3	5	16	32	6	5		Rare Dissolves now arrive! our hearts
27	3	50	17	30	7	50		grow strong;
28	4	35	18	28	7	35		We'll do do no right, nor yet will suffer
29	5	21	19	26	8	21		wrong.
30	9	5	20	24	9	9		

New Moon the 7 day, 11 min. past 9 afternoon.
 First quarter the 14 day, 47 min. past 9 in the morning.
 Full Moon the 22 day, near 8 in the morning.
 Last quarter the 30 day, 41 min. past 8 in the morning.

*Sometimes with Sleep, sometimes with wine we strive
The cares of life and troubles to deceive.*

The configurations of this month appear mostly benevolent, and upon a sudden the People in general are in great expectation of happy dayes approaching; But (according to the Proverb) 'tis not one Swallow brings a Summer; did not Self ends, Preferment, Bribes, Divisions, &c. Frustrate our greatest hopes we might then live happily in the midst of Peace and Plenty, which I pray God continue. Many Treaties and serious consultations now on Foot, and some material Counsels draw near conclusion, yet not without Labour and Difficulty. Let us still hope well, pay obedience to our Superiours, and love one another; and let such Persons that will engage themselves into Treacherous and Rebellious Actions, (either from the heat of Zeal, or Siniſter ends) perish in their Attempts.

*All in a Rage! the Common people Cry.
There is no Faith below, 'tis all on High.*

Let us observe that there be divers meetings of the Planets this month and amongst the rest some few malevolent Aspects of evil portent, Religion and Law, are in concert. The more prudent part of this Nation are for reforming and promoting both, but the Rabble and Giddy, headed multitude are Enemies to their very being. Now we ought not to forget the eight months Transit of Mars through the sign Virgo, for 'tis of eminent signification and by this time 'tis strange if we have not had some experience thereof. Mars enters Libra the 21 of this month, and continues not so many weeks in this sign, as month in the former. Therefore it concerns those persons that have Virgo or Libra for their Horoscopes, as also those places either Kingdomes, Countries, Cities, &c. That are under the same.

But what those are, let Time itself discry,
For that will speak the truth, so may not I.

All! afterwit is like a shower of Rain
That falls untimely on the Ripene Grain.
 The configurations of the Planets this present July, are neither many nor very material either in the change of the Air or Mundane Contingencies. That which is most worthy our Notice is the late Motion of Jupiter and Mars into such signes of the heavens, that are by Astrologers called Cardinal, and are in Square, or a fourth part of Ecliptick asunder. Now every Agent endeavouring vigorously to promote his own clandestine designs, but the pains and vigilance of some worthy persons in power, contribute much to our safety and future happiness, and we may very well consider and acknowledg it as no mean blessing, which is and hath been daily conferred upon us by the hand of Providence. We hope the Affairs of England remain still in good order notwithstanding the confusion that hath been so long endeavour'd, and so happily frustrated and confounded. Pleasing news in general arrives towards the end hereof. Rat

London! Beware of Fire, and Beasts of Prey.
 And something else; But what, I will not say.

B 3

4	2		5	22	4	5	6	The Eclipse of the Moon the last Month, visible in our Hemisphere, and the invisible Eclipse of the Sun at the beginning hereof, are worthy of our consideration. Carden tells us in ge- neral terms that Eclipses of the Lumi- naries, at the very time thereof, or even before they happen, raise show- ers of Rain, others great droughts, some violent winds, others Earth- quakes, some scarcity of the Fruits of the Earth others Terrible Fires &c. I expect about this time strange kind of whispering of some extraordinary thing suddnly to break out; but of what kind or the very particular Ac- cident I dare not be so presumptuous as to Conjecture. It is sufficient (as the times now go) to hint at Gene- rals only, and leave particulars to such daring men of Art that with much confidence, (and no less Impu- dence) can play the Janns to admi- ration. Some worthy person amongst us deservedly promoted now or near this time, grand matters now under debate and many grave and worthy Persons employed therein to good purpose. But

Complain not of misfortunes to thy
Foe,
For he will triumph when he sees
thy woe.

Many (and those considerable to)
are the configurations of this month,
and I may say as various will be the
Transactions thereof. Some Grander
may expect to be called in question,
and very material things will be laid
to their charge of which I have no
more to say. I hope the Councils and
consultations of this month may ter-
minate for the general safety and ad-
vantage of the whole Kingdoms. Re-
ligious controversies and disputes, are
now sufficiently bandied about, some
persons are imprisoned others inlar-
ged, 'tis a busie time in earnest, much
tickling amongst us every man per-
sues his own Interest and strives to
advance himself, *Aur cesar aut nihil*,
lenity of Intelligence arrives from se-
veral parts of Europe, and most of it
pleasing to the London Merchants.
Heavens defend us from further Di-
visions, especially in matters of Reli-
gion; for the Celestial Influences seem
to perpend some such thing—

Now if those glorious Bodies disa-
gree,
In their more noble mixtures what
shall wee?

1687.

November hath xxx days.

First Quarter the 8 day, 38 min. past 10 morning.

Full Moon the 15 day, 8 min. past 5 at night.

Last Quarter the 22 day, 50 min. past 5 morning.

New Moon the 29 day, 56 min. past midnight.

us, Thighs.

♑ Aquari-
us, Legs.

♒ Pisces, the Feet.

The Characters of the Seven Planets.

♄ Saturn, ♃ Jupiter, ♂ Mars, ☉ Sol, ♀ Venus, ☿ Mercury,
♁ Luna, ♉ Dragons Head, ♏ Dragons Tail.

Upon the Twelve Signs.

Majestick Aries clad in's Golden wooll,
Commands the Head and Face: The Zodiack's Bull
Rules Neck and Throat: The Arms and Shoulders lye
Subjected to the Zodiack's Gemini:
Cancer the Breast and Stomack do obey,
And Regal Leo o're the Heart doth sway
His Royal Scepter, whilst the wanton Maid
Claimeth the Belly: Reins and Loins are way'd
By the Coelestial Libra: Secrets are
The poisonous Scorpions: And the Thighs the share
Of Sagittarius: But the Feeble Knees
Fall to the Goat: The Legs are standing Fees
Unto Aquarius: Whilst the Feet do bend
Their steps to Pisces, and assign an E N D.

This Table shews the Interest of any sum of Money from 1 s. to 100 l. from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever, and note that the greater exactness the penny is divided into a 100 parts, so that 25 parts are a farthing, and 50 parts a half-penny, and 75 parts 3 farthings, &c. Example,

The Interest of 100 l. for six months one week and one day, is thus found by the Table.

Interest of 100 l.	for 6 mon. 03-0-0-00	for 1 week 00-2-3-61	for 1 day 00-0-3-94
	Total 03-2-3-94		

**A SYNOPSIS of all the Mutual Aspects of the Planets
throughtout each Month of the Year 1681, with the Day
and Hour thereof, as also the Signs they fall in.**

Note; that (m) signifies morning, (n) noon, and (a) afternoon.

*Astrological Predictions and Observations upon
the Year of our Lord God 1681. From the Solar In-
gresses, Eclipses, Conjunctions, and other concomitant
Configurations of the Celestial Bodies.*

(1) **A**ND first I shall begin with the *winter-Quarter*, which commences when the *Sun* touches the first point of the cold earthy Tropical Sign *Capricorn*, viz. *December* the tenth 9 h. 9 m. after Noon 1680, and ends *March* the 9th following— At which time the very beginning of *Virgo* Ascends in our Meridian, and about 20 degrees of *Taurus* Culminates.

Many and very signal are the Configurations of the *Planets* this very Month of *December*, as also in the subsequent Months of *January* and *February* even to the *Suns Ingress* into *Aries*, as those that please to examine this and my last years *Synopsis* of the mutual Aspects of the Planets may find. Now at the *Suns Ingress* into this Tropical Sign, the *Moon* defluxes from an Opposition of *Jupiter* and Quadrant of *Mars* (that *Historian Bouncer*, and *Jolly Bully* amongst the Stars) and hastens to a Conjunction with the *Sun*, she is posited in the North Angle in *Sagitary*, *Jupiter* is Retrograde, and in Detriment in *Gemini* in the *Midheaven*, *Mars* near the Cusp of the Second in *Virgo*, *Venus* and *Mercury* near Conjunction in the Fifth in *Capricorn*, and dejected *Saturn* in the Eleventh in *Cancer* in Opposition to them both; and thus stands the Position of the Heavens at the Initiation of this *Winter Quarter*.

And now if I may crave the boldness to give my brief *Astrological* (and conjectural) Judgement of the Affairs of this Quarter (notwithstanding my foregoing monthly Predictions) I shall modestly proceed thus, viz.

The people in general both in *England* (& most other Kingdoms and Countries of *Europe*) are still possest with doubts and vain fears of some unhappy *Catastrophe* impending, they are too subject to repine, and complain of the times, as also want of Trade, of Losses, Crosses, and vexations in abundance,— and not only so, but many Contentions and unhappy Divisions and Animosities are strangely fomented, sometimes in point of Religion (which should be much controverted about this time) and sometimes upon the least accidental occasion they swell with hateful malice against each other.

Astrological Observations for the Year 1681.

This is not all; (and yet some may say, when was it otherwise?) But 'tis farther observable, that most part of this *Quarter*, the generality of the people should be too apt to repine, and secretly whisper very hard things against the Actions and Proceedings of their Superiours, and principal Rulers, nor will it be any easie matter to rectifie these enormities. Many scandalous and dangerous *Pamphlets* and *Libels* are, privately dispers'd, strange Robberies on the Land, and casual mischiefs at Sea by tempestuous storms and otherwise. But these things may be apparent more towards the midst and end of this *Quarter* than the beginning. Various intelligence arrives from several parts of *Europe*, of very notable projects now hatching, which may be thought by good Wits to be almost prodigious, and perhaps end in confusion.——Great are the private Consultations, Councils and Debates, of those worthy *Herps* that sit at the *Stew*, and there with no small care, and no less pains and diligence do they steer the *Helm* of Publick Affairs in the midst of unsetled times.——*Fiat Dei voluntas.*

The *Diseases* of this *Quarter* should be for the most part of a cold and moist Nature, as Coughs, Hoarseness, Cathars, Apoplexies, Stoppage at Stomach, Inflammations, Dropsies, Stiches, Cramps, Aches in the Joynts, the Scurvey, Tedious Agues, Consumption of the Lungs, and ulceration thereof, Melancholy, Wind Collick, and divers others, but no Epidemical Diseases, *From all which good Lord Deliver us*——And thus I conclude the Judgment of this *Quarter*, with this following piece of Poetry, which may very well be applied to our present Times, viz,

*Some with bold Labour plough the faithless Main,
Some rougher Storms in Princes Courts sustain.
Some swell up their slight Sails with poplar Fame,
Charm'd with the foolish whistlings of a Name.
Some their vain wealth to Earth again commit:
With endless Cares some brooding o're it sit.
Country and Friends are by some Wretches sold,
Th' Ligon Syrian Beds, and drink in Gold:*

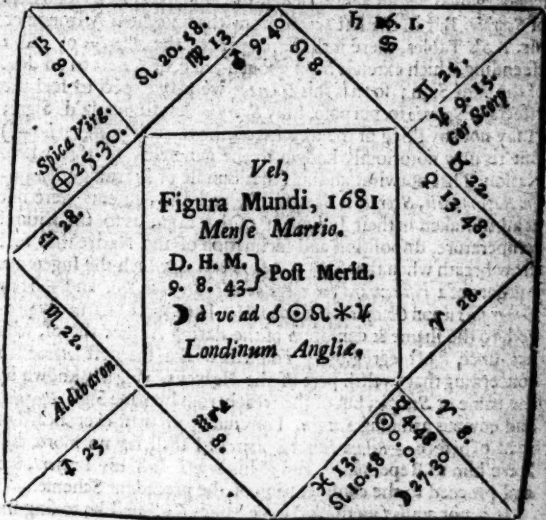

*No pride too high for profit can be shewn;
Not Brothers Blood, nor hazards of their own.*

Cowley.

By HENRY COLEY.
Of the Spring Quarter.

Of the Spring Quarter.

Figura Coeli ad Aequinoctium vernum, seu Ingres-
sum \odot in γ , 1681.

According to the *Rudolphine Tables*, this is the position of the Heavens at the *Suns* Ingress into *Aries*, and here we have the very latter degrees of the Celestial Ballance Ascending, and *Venus* Lady thereof in *Taurus* her own dignities Angular. Also the *Moon* hasting to a Conjunction of the *Sun*, who together with *Mercury* are applying to the Sextile of *Jupiter* in the 8th house, & *Mars* is in perfect Square to *Jupiter*, and in Trine to *Venus*, and Sextile of *Saturn*.

But according to the *Caroline* Tables the *Sun* touches the *Ball*

Astrological Observations for the Year 1681.

point of *Aries*, March the ninth 11 h. 2. m. 24 Seconds afternoon in the Meridian of *London*, and at that time we shall have 16 deg. of *Virgo* Culminate, and about 24 deg. of *Scorpio* Ascend, *Saturn* then in the 8th House, *Venus* in the 6th, the *Sun* and *Moon* in the 4th, and *Mars* just past the Meridian; and hence it appears that in the first Figure there is the first part of the *Asterism* of *Virgo* Ascends, which begins about 18 deg. of *Libra*, and ends about 8 deg. of *Scorpio*. But in the last Scheme from that excellent Astronomer Mr. T. S's Tables, there is the latter part of the *Asterism* of *Libra* ascending, which extends from about 19 deg. of *Scorpio* to 26 deg. of the same Sign; so that this Quarter we may expect to feel the effects of *Scorpio* to purpose, I say *Scorpio* that stigmatiz'd Sign; (I say not any thing of the treacherous humane Sign *Aquarius*—) But 'tis now notoriously known to the generality of this whole Nation, That notwithstanding (that Bundle of Learning) *Obsequium Rationabile*, *Scorpio* is *Scorpio* still, and the Antients were not at all mistaken in their Judgment of that Sign, as to the natural temperature, disposition and Inclination of the Native that first drew breath when that Sign was *Horoscopical*, which the Ingenious Authors of a just reward for unreasonable Service, &c. and Farther Remarks upon *Obsequium Rationabile* have most Learnedly proved, to the shame & confusion of the daring Author thereof, who has since most egregiously confirmed the sharpest *Aphorisms* concerning that twelfth part of the Heavens, vulgarly known by the name of *Scorpio*; but of the treacherous humane Sign *Aquarius*, and envious grinning *Saturn*, I presume, no man ever heard or read of before.—*Risum teneatis amici?* I shall say no more, but leave him to Repentance, and to his Beads and his Prayers, &c. and proceed to the consideration of the precedent Scheme.—

It is not amiss (methinks) some times Cuckow-like to sing the same Song in our Writings, seeing that as a good Tale can never be too often told; so must we ingeniously confess with the Poet, that *Nullum est jam dictum, quod non dictum est prius*, and many times when we strive to mend the matter, we (Tinker-like) mend one hole and make two, and so spoil all. But in general terms I proceed thus, and let my ten years causeless, but envious Adversary (whom I value as smoke) Cant upon it if he please—The Angles are partly moveable, and partly fixed, and the Planets posited as aforesaid, (as may be seen by the Scheme it self) and therefore needs no further Repetition, whence this Judgement (according

B, HENRY COLEY.

to the Rules of *Astrology*) doth naturally arise. The people in general this *Quarter* will be brisk and active, & yet still most strangely possess'd with jealousies and fears, as if they foresaw some prodigious storm approaching, *viz.* either an Epidemical Distemper which may tyrannize amongst them, or some unhappy breach amongst the discontented sort, arising from Religious Disputes, & matters of Conscience at home, or open hostility in defence of our selves against a potent and publick enemy abroad— But without doubt in this & the ensuing years very great and superlative actions will be manifestly appear, not only in *England*, but in most Kingdoms and Countries of *Europe*, and many honest well-meaning persons must be content to undergo much labour and trouble. I fear also a corrupted and contagious Air, which may not only be dangerous, but very destructive to mankind: God preserve us from a *Plague* or other *Pestilential Diseases*—for if the poysoning Quality of these Corruptions should penetrate the Pores of the body, and thereby infect the Blood and Humours, what else can be expected? But if the position of the Heavens (take them which way you will) be but seriously considered, there may be more Honey than Gall extracted from thence, especially in any thing which immediately relates to our *English Affairs*; and as for Foreign Transactions, I shall here wave the consideration thereof; but must tell you matter is preparing, and strange and wonderful *Catastrophes* are not only feared but expected, and many persons formerly in good esteem, and very splendid, are now as much rejected, and cast out of favour, let them thank themselves, 'tis dangerous to *Spawn a Plot*, but *Quod supra me nihil ad me*. As for the Diseases of this *Quarter* (except some Epidemical Distemper break out, which I pray God divert) they will be for the most part such as this season usually produces. Much more might be said, but being limited, I must proceed to the consideration of the other half year, and conclude with the *Poet* in these words.

*The man which changes Gold for burnish'd Brass,
Or small right Gems for larger ones of Glass,
Is not at length more certain to be made
Ridiculous and wretched by the Trade,
Than he who fills a solid good to buy
The painted goods of Pride and Vanity.
If thou be wise, no glorious Fortune choose,
Which 'tis but pain to keep, yet grief to lose.
For when we place ev'n Trifles in the Heart,*

Astrological Observations for the Year 1681.

Of the Sun's Ingress into Cancer, or the Summer Quarter.

THE glorious Lamp of Heaven the Sun doth this year touch the first point of the Tropical Sign *Cancer* (or if you will the *Earth Capricorn*) June the 10th at 21 min. past 11 at night, at which time 21 deg. of *Sagittary* Culminates, and 7 deg. of *Pisces* Ascends in the Meridian of London, the Sun is in Conjunction with *Jupiter* in the 4th, and so is *Mercury* also, but in Square to *Mars*, and he posited in the 7th house; the Moon is near the Cusp thereof, she separates from a Sextile of the Sun, and applies to a Sextile of *Venus* and Square of *Mercury*; as those that please to set the Figure may see. It was well express'd by that Learned Knight Sir T. Brown in his *Relig. Med.* That all cannot be happy at once, since the glory of one State depends upon the ruine of another, there is a Revolution and Vicissitude of their greatness, and they must obey the fixing of that wheele not moved by Intelligences, but by the hand of God, whereby all Estates arise to their Zeniths or Vertical Points, according to their predestinated periods. The Face of things appear in a very sickly Condition, also distracted Councils, impertinent Petitions, and a wilful obstinacy too visible amongst the generality of people, notwithstanding the Endeavours of some well minded persons to compose all things into a settled order—*Saturn* has not yet left the Sign *Cancer*, and *Mars* is in *Virgo*, therefore those Cities or Countries subject to these Signs must expect the fruits or effects rather of their Influence; we may hope well as to the affairs in London, for *Jupiter* and *Mercury* keep Court with the *Trinis*, and though *Mars* darts a *Quartile* Ray to *Mercury*, yet *Mercury* commands him, according to the Proverb, *Curs'd Cows have short Horns*, so that I say we may hope well, but *Mars* is in Sextile to *Saturn* Lord of the 12, and he is posited in the 7th house (as before I hinted) and Authors tell us that such a position produces much evil, many Controversies and Quarrels between man and man, as Law Suits, Duels, Murthers, sometimes Wars, *Cum multis aliis*. But since this Ingress doth but confirm the former, and produces in mundane Affairs the same Contingences, therefore I shall wave all further scrutiny, but do much fear a very sickly Summer, or general Calamity amongst mankind. Strange unseasonable weather, I fear also (to the damage of the Country man) a scarcity of Corn, or lean Crops in many places of England, but more in some succeeding years than at

present, but of these things I shall not be positive, as to the very time, since there is a *vicissitude* in Nature, the knowledge of which is proper only unto the Almighty God and his blessed Angels, and without special Revelation cannot be found out, by the sharpest Inspector into Natural Causes. Here I should mention something of the Diseases like to rage this Quarter, but since I judge it may be a Sickly time in general, I think it needless to guess at particulars, and conclude it may not much vary from this Season in former years, consideration had to the aforesaid Caution. And thus I conclude my Judgement of this Quarter with these Pathetick Lines of the famous Cowley —

*We look at men, and wonder at such odds
Twixt things that were the same by Birth,
we look on Kings as Giants of the Earth,
These Giants are but Pigmies to the Gods :
The humblest Bush and proudest Oak,
Are but of equal proof against the Thunder-stroke.
Beauty and Strength, and Wealth, and Wit, and Power
Have their short flourishing Hour,
And love to see themselves, and smile,
And joy in their Preeminence a while.
Even so in the same Land,
Poor Weeds, rich Corps, gay Flowers together stand,
Alas! Death mows down all with an impartial band.*

*Of the Suns entrance into the Equinoxial Sign Libra, or the
Autumnal or Harvest Quarter,*

WHich this year commenceth Sept. the 12th, 2h. 30 P.M. Upon the Meridian 15 deg. of Scorpio Culminates, and 9 degr. of Capricorn Ascends in the Meridian of London. Those that have a desire to see the position, they may (if able) see the Scheme thereof— where they will find the Moon separating from a Sextile of Venus and Trine of the Sun, and applying to an Opposition of Saturn, also Saturn in Sextile to the Sun, and Jupiter in Sextile to Mercury, &c. The Configuration of the Planets in this Quarters Ingress (*viz.* the Scheme thereof,) promise no great things, but the late Eclipse of the Moon, and the remove of Saturn out of Cancer into Leo may be considerable in their Effects.

Astrological Observations for the Year 1681.

and 'tis more than probable, that a Potent Nation in *Europe* may not always continue to be so victorious as of late years they have been. Many Factions and Actions also may be expected both in Councils and Military Affairs in some Countries of *Europe* of very high concernment; and I may rationally conjecture that the Actions of this year in general, should be very conspicuous, and probably more famous than in some preceding years, but yet succeeding years will assuredly produce such lofty matters, and of that signal concernment in most parts of *Europe*, that some preceding Generations (I presume) were not acquainted with the like, and perhaps never dream't of, but of what nature, 'tis Time must make manifest, I can only hint, I dare not be positive nor predict particulars, since I cannot pretend to be one of those highly illuminated *Astrologers* of this Age, that delight to Threaten and Thunder in their *Predictions*, thereby to make poor Mortals tremble. I have great hopes we in *England*, notwithstanding all our Enemies abroad, and our false Friends at home, may yet remain quiet, and in a reasonable good condition, which is as much as can be desired, and ought to be earnestly endeavoured by every true born Englishman. A sickly time indeed may very well be expected; let us submit to the will and pleasure of the Almighty, and endeavour to amend, and love one another, and then, if there be but unity and agreement at home, we need not fear our greatest Enemies abroad. And thus I conclude my Judgement upon this *Quarter* (as in the former) — from the Learned Cowley.

*The man, who in all wishes he does make,
Does only Natures counsel take.
That wise and happy man, will never fear
The evil Aspects of the Year,
Nor tremble though two Comets should appear;
He does not look in Almanacks to see,
Whether he Fortunate shall be:
Let Mars and Saturn in the Heavens conjoin,
And what they please against the Worlds design,
So Jupiter within him shine.*

By HENRY COLEY.

Of the Eclipses which happen this present Year, 1681.

Four times this year will the Luminaries be deprived of their Light, viz. Twice the Sun, and as often the Moon; the first of the Sun will be March the tenth, about one in the Morning in the Sign *Aries*, but not visible to us in our Northern Hemisphere, yet it may be seen by our *Antipodes*. The Second Eclipse of the Sun falls Sept. 2. near 20 degrees of *Virgo*, a small Eclipse about three in the Morning, and therefore not to be seen in our Horizon.

The first Eclipse of the Moon will be in 14 deg. 35 min. of *Virgo*, but inconspicuous to us, though considerably great; for eight parts of the Moons Body will be darkned, and remarkable Effects will certainly follow, of which (and the other visible Eclipse of the Moon) here is no room to discourse, but they are already considered in the former Judgements and Monthly Predictions, and may be handled largely by other Writers, of which I recommend the Reader to the perusal of Mr. Lilly's *Anglicus* in particular for this present year for further satisfaction. This Eclipse will be February 22. at 46. min. past 9 in the Morning, the middle time at 11 h. 8 min. first mane, and the end at 34' 14" past Noon, the whole duration 2 h. 48' 4". The second Eclipse of the Moon will be August 19. 1681, and may be visible to us, and worthy the Observation of the Diligent Astronomer. It begins at 2 h. 16 min. 40 Seconds in the Morning, and the middle time or greatest obscuration 48' 42" after 3. and the end at 5 h. 20' 12" mane. The Digits Eclipsed 9. 51. The Calculation from the *Caroline Tables* is as followeth.

	D.	h.	m.	s.
Mean Opposition at London August 1681—	18	9	47	18
	s	d	'	"
Mean Anomaly of the ☉'s Correspondent is—	2	0	38	53
Mean Anomaly of the Moon is—	2	7	44	14
Longitude of the Sun from the Equinox—	5	5	57	3
First Equated place of the ☾ in her Orbit—	11	3	0	12
Difference from the Opposition to come—	0	2	55	55
Hourly motion of the Sun—	0	0	2	25
Hourly motions of the ☾ first Equated } 2 Sign. 9 Deg. of mean Anomaly —	0	0	31	55
Difference of the hourly motions of ☉ & ☾—	0	0	29	30

The

Astrological Observations for the Year 1681.

Interval of the mean and true \odot odd	0	5	49	40
Equal time of the true Opposition	18	15	46	52
Difference of the \odot & the true Opposition	00	00	00	32
Exact equal time of the true \odot correct	18	15	46	5
Mean Anomaly of the \odot correspondent	2	00	53	57
Anomaly of the \odot also is	2	10	59	35
True place of the Sun in <i>Virgo</i>	Virgo	6	11	10
Place of the \odot in her Orbit \propto	\propto	6	11	10
Argument of Latitude	5	24	15	3
Reduction add	00	00	01	18
True hourly motion of the \odot from the \odot	00	00	29	45
Time of Reduction subtract	00	00	02	37
Equal time of the true Opposition in the Ecliptick,	18	15	43	28
Sum of the Horizontal Parallax of the \odot & \odot				
Semidiameter of the \odot subtract	00	00	15	47
Semidiameter of the Earths shadow	00	00	39	36
Semidiameter of the Moon	00	00	14	56
Aggregate of the Semidiameters	00	00	54	32
Latitude of the Moon North	00	00	30	01
Parts deficient	00	00	24	31
Digits Eclipsed	Digits 09 51			
Time of Reduction add	00	00	02	37
Equal time of the greatest Obscuration	Hours	15	48	26
Motion of half Duration	00	01	31	46
Beginning of the Eclipse	Hours	14	16	40
End thereof	Hours	17	20	12

Advertisement.

THese highly approved and only true *Spirits of Scurvey-Grass*, both Plain and Golden, famous for their admirable Cures in *Scurvey*, *Croppsie* and several other general Distempers, are exactly and faithfully prepared and sold by the first Author *Robert Baseman* at his House in *Pauls Chaine* near *Dockers Commons*, *London*, with Printed directions for their use. The Bottles are sealed with his Coat of Arms, The *Half-Moon* and *Ermins* to prevent Counterfeits. Price one Shilling each Bottle. These are the true *Spirits*, notwithstanding all the late pretenders thereunto, therefore let all persons beware they are not cheated with these upstarts.

James

Johns *Word of Length* near *Windsor*, Surveyor, can perform Artificially the conveying of Water, either by Channels, or cutting new Rivers, for making them Navigable either by Locks or Turn-pikes. He also can build New, or repair Old Bridges over Rivers. He undertakes the new Building or Reparation of Water Mills, or any Water-works, the Hanging of Bells, Drilling, Surveying of Lands of all sorts, &c. taking the Plot or Prospect of any Town. Also a new Invention for Quenching of Fire. He has lately invented an Engine for Pumping of Water, which with the Assistance of one only man, will Pump up two Tun of Water in one minute, and with ease will raise water 100 Foot high and upwards. He makes Cyder Mills also, and has performed many rare Inventions of this kind, the like not hitherto done by any man.

AT the Sign of the *Golden Griffin* in *Bell-Savag*-yard on *Leaden-Hill* liveth *William Boyse*, the only English Operator in Glasse, and the most expert in making Artificial Eyes, so exact as not to be distinguished from Natural, they are made of Enamel, with Colour mixt of the same, without either Paint or Lead, and worn with much ease, and so curious that they have the Motion of the Natural Eye, being exactly made to the Colour and bigness of the same, which renders them very ornamental and Commodious, the like was never made in *England*; the truth whereof is well known to many persons both in our own and some other Nations.

Geography Rectified, or a Description of the World in all its Kingdoms, Provinces, Countries, Islands, Cities, Towns, Seas, Rivers, Bays, Capes, Ports, their ancient and present Names, Inhabitants, Situations, Histories, Customs, Governments, &c. Illustrated with above 60 new Maps, and performed according to the more accurate Discoveries of Modern Authors. By *Robert Morden*. Sold at his Shop at the *Atlas* in *Cornhill*, and by *Thomas Cockeril* at the *Three Legs* in the *Poultry*.

Buckworth's *Lozenges*, Famous for the Cure of Coughs, Colds, Catarrhs, Hoarseness, &c. being also a great cordial, and a Sovereign Preservative against all contagious Distempers, malignant Air, and unwholsom Weather, well approved of by the chief Physicians of the Colledge, to whom the true Receipt hath been communicated by the Publisher hereof: Are now more faithfully prepared than since the Author's decease, and are Licens'd for publick Use and Benefit, by *Sir John Micklethwait*, President of the said Colledge, *London*, being rightly prepared only by *James Skipton* Apothecary at the *Crown* in *Hatton Garden*.

*Arts and Sciences Mathematicall, professed and taught by
the Author HENRY COLLEY, Philomath, at his House in Bald-
wins Court over against the Old Hole in the Wall in Baldwins
Garden near Gray's-Inn-Lane.*
